

NIPSON Technology SAS has signed a partner distributionship in the United Kingdom with Nipson Technology UK Ltd based on continuously improving and constructive business relations.

NIPSON Technology UK Ltd is a leading Digital Equipment and Solution provider in the United Kingdom and has pioneered the introduction of modern equipment and systems to the UK Printing industry.

Nipson Technology UK special focus is the provision of High-Speed Digital Printing Solutions and services. They have skilled business consultants; project managers, systems engineers and software developers using modern, proven technologies to deliver cost-effective and cohesive systems which fully meet the client's business challenges.

The technology behind Nipson Technology SAS success is Magnetography, which uses a magnetic print drum combined with flash toner fusion. Introduced nearly two decades ago, magnetography has provided users with an unsurpassed combination of high speeds, low total cost per page, and total application flexibility. NIPSON Technology's continuous investment in advancing its technology gives users an important advantage to grow their business

**We see tremendous opportunity for our customer base as NIPSON Technology UK will continuously be at their service, always targeting to offer technological innovations that will improve their business.**

Nipson Technology provides the most flexible Digital Printing Equipment in the printing industry. All the companies in publishing, print-on-demand, transactional, financial, and mainly in the security printing will all benefit from Nipson Technology's unmatched combination of production throughput, reliability, and flexibility.
